

A Guide to walks and hikes around the Great Lake Taupō District

\$3.00

nature's great escape

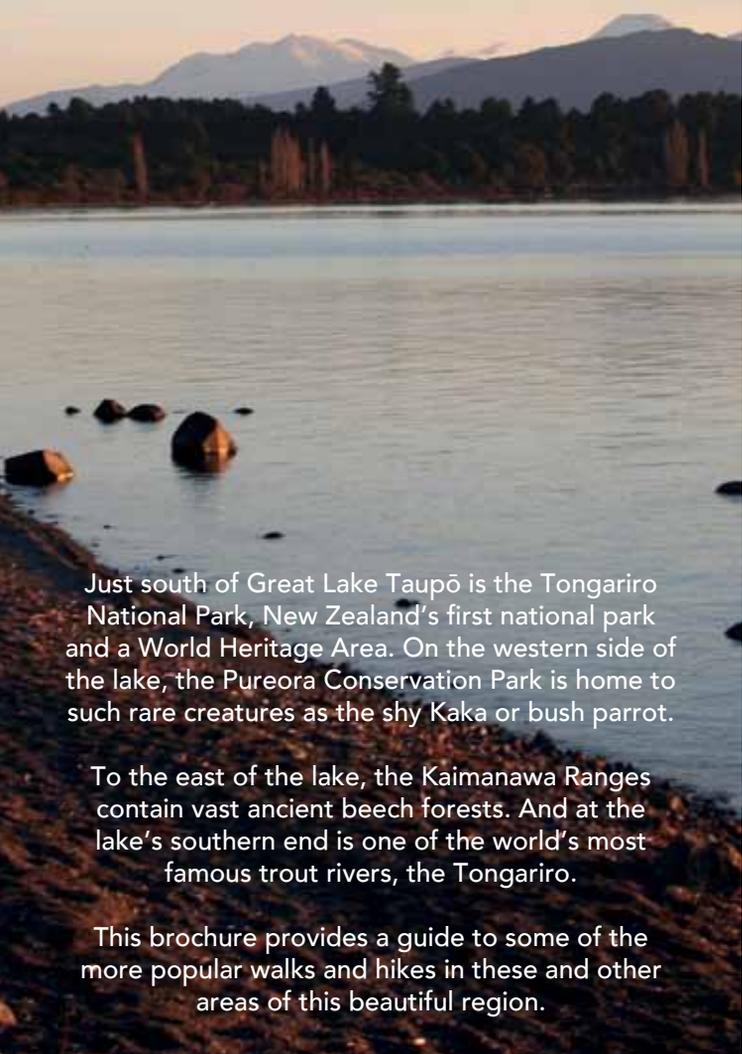

Rocky Road

Nature's Path

The Great Lake Taupō region has some of the finest examples of untouched, unspoilt, uncrowded country in New Zealand.

Just south of Great Lake Taupō is the Tongariro National Park, New Zealand's first national park and a World Heritage Area. On the western side of the lake, the Pureora Conservation Park is home to such rare creatures as the shy Kaka or bush parrot.

To the east of the lake, the Kaimanawa Ranges contain vast ancient beech forests. And at the lake's southern end is one of the world's most famous trout rivers, the Tongariro.

This brochure provides a guide to some of the more popular walks and hikes in these and other areas of this beautiful region.

WELCOME

Nau mai, haere mai. Welcome to the Great Lake Taupō District.

Many outdoor activities are available here. Some of the most popular are walking, hiking and cycling. This brochure gives a brief outline of walks and tracks around Lake Taupō - from the town of Taupō to Turangi; from Kinloch to the Kaimanawas. They cover a range of environments from lake and river walks to tracks in thermal and historic areas. Cycling opportunities included in this brochure are shared with pedestrians. A dedicated cycle brochure is also available from local visitor information centres.

As the Taupō area continues to grow more walking and cycling tracks will develop.

This brochure is jointly produced by the Taupō District Council, Destination Great Lake Taupō and the Department of Conservation.

BEGINNINGS

The Taupō area owes its spectacular scenery to its location in an active volcanic zone. Violent eruptions have occurred over millions of years creating the caldera (collapsed volcano) filled by the waters of Lake Taupō, extensive lava plateaux and other volcanic landforms such as Mt Tauhara. Ash layers, ignimbrite cliffs, pumice and carbonised wood fragments provide constant reminders of a history of volcanic upheaval.

Attracted by the lake and thermal resources, the area was settled by Maori in the late 14th century, becoming a stronghold for the Ngati Tuwharetoa people. European visitors came to the scenic heart of the North Island in the middle of the 19th century and settled here from about 1860.

Lake Taupō:

- Is 622 km² in size
- Reaches 160 m in depth
- Occupies a series of old volcanic craters
- The most recent eruption occurred about 1800 years ago when 60 km³ of debris was blasted out of a single vent
- Its full name is Taupō-nui-a-Tia (the great cloak of Tia). Tia was a chief and explorer from the waka Arawa

Tongariro River Walkway

TRACK INFORMATION

CLASSIFICATION

 **Short walk:** well formed track with easy grades. Constructed to 'shoe' standard. Suitable for people of all ages and abilities.

 **Walking track:** A defined, formed track. Constructed to 'shoe' standard. Suitable for people of most ages and abilities.

 **Tramping track:** limited track formation, often with steep grades. 'Boot' standard. Suitable for experienced, well prepared people.

TRACK TIMES AND CONDITION

Times given are approximate. Contact Taupō or Turangi I-site Visitor Centres or the Department of Conservation to check on current track and weather conditions.

DOGS

Dogs, on a leash, are allowed on some tracks but certain conditions may apply. Contact the Taupō District Council for a brochure and further information. Remove all dog droppings.

SYMBOLS USED IN THE BROCHURE

 Wheelchair accessible	 Toilet(s)	 Historic site
 Dogs allowed on leads	 BBQ facilities	 Boat ramp
 Views	 Picnic facilities	 Camping
 Bikes permitted	 Information signs	 No Fires allowed
 Swimming	 Fishing	

A white line through a symbol indicates that the activity is not permitted (e.g. 'no fires' see above)

ESSENTIAL GEAR LIST

The following should always be carried

- Waterproof raincoat and warm clothing
- Suncream and sunglasses
- Sunhat and a warm hat
- Drinking water and food

THINK SAFE

- Let a reliable person know your walking plans. Check in with them on your return. If you are overdue they should call the police
- Always lock your car and don't leave valuables inside it
- Drive with extra care on unsealed or icy roads

ENVIRONMENTAL CARE CODE

Protect plants and animals

Remove rubbish

Bury toilet waste

Keep streams and lakes clean

Take care with fire

Keep to the track

Consider others

Respect our cultural heritage

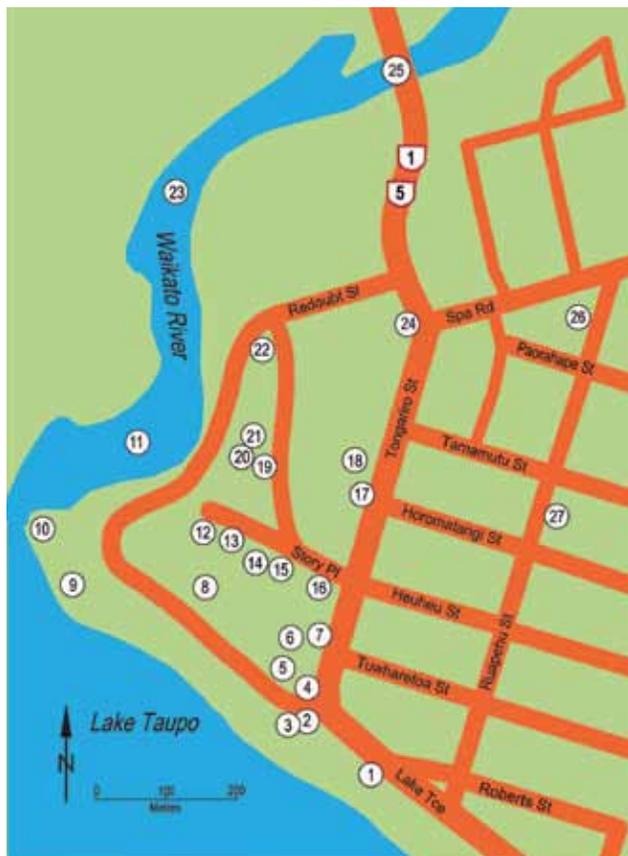

Enjoy your visit

Toitu te whenua (Leave the land undisturbed)

TAUPŌ TOWN WALKS

At the time of early European settlement (late 1860's and 1870's), Taupō was known as Tapuae-haruru and was considered by the government of the time to be strategically important as it stood at 'the crossroads' of the North Island. Traditional Maori tracks from all around the central North Island converged here. These tracks made up a communication network the government thought prudent to control.

Today you can enjoy a walk around some historically significant sites and more recently added attractions within the CBD. Start at the Taupō i-SITE Visitor Centre and look out for commemorative plaques at some locations.

1. Lakefront Seat

To commemorate Miss Margaret Sweeney's swim across Great Lake Taupō on 29 January 1955 from Tokaanu to the foreshore (in front of the seat) a distance of 42 kilometres.

2. Maori Carvings

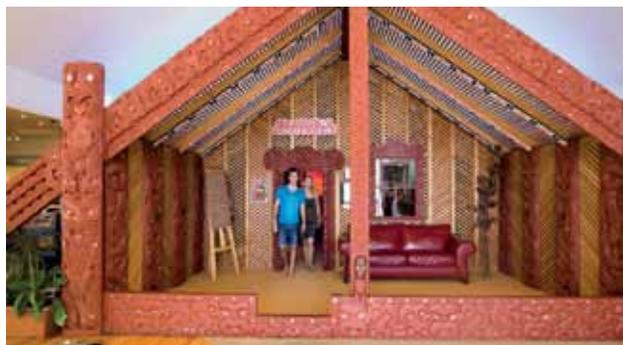

These carvings are part of the 'Reid Carvings' - a collection of 51 pieces, mostly located at the Taupō Museum. They were presented to the people of the Great Lake Taupō Region for safe keeping by the late Mrs Lucy Rongoheikume Reid, daughter of Joseph Rickett, one of the original Armed Constabulary members that settled Lake Taupō. The carvings are the work of master carver, Tene Waitere, a survivor of the 1886 Mt Tarawera eruption.

3. Lakefront Lookout

In 1961 the Taupō Lions Club built this lookout which provides visitors with an expansive view of the lake and Tongariro National Park (World Heritage Area) at the southern end of Lake Taupō.

4. Electric Trout

The first 'electric trout' was created in 1985 for the Dawn Walker International Trout Fishing Tournament. In 1999 the Taupō District Council commissioned this replacement. It was designed and constructed by Callum Guillemont, a local electrician and craftsman.

Reid Carvings - Taupō Museum.

5. Pakeke Lions Cobb & Co Express

The monorail train on the South Domain is owned by the Pakeke Lions Club and operates as a fundraising venture. The train, locally designed and built, began operating in 1993.

6. South Domain Gardens and Carvings

In 1993 the Taupō District Council constructed and developed gardens and a sculpture park in the South Domain.

7. Auntie Ku's Garden

This garden is dedicated to Auntie Ku (Miss Ellen Rickit, 1882-1958) in recognition of her years of service to the people of Taupō.

8. Taupō Bowling Club

The first school in Taupō was built on land that is now home to the Taupō Bowling Club. The private school quickly became too small for the growing population and in 1894 a new public school was built in Ruapehu Street.

9. BBQ and seating area

Located at the Yacht Club carpark, this coin operated BBQ was built by the Taupō Lions Club in 1991. The small seating area at the river end of the carpark was constructed by Pakeke Lions in memory of past members.

10. Petersen Wharf

The Petersen Wharf was constructed by the Department of Internal Affairs in memory of Lt-Cmdr Peter Petersen RNZNVR (Great Lake Taupō Harbourmaster from 1955 to 1978).

11. Boat Harbour

Whale boats, used by the Armed Constabulary, were the first European boats on Lake Taupō. The largest boat on the lake before 1900 was 15m long and operated a regular passenger service across the lake to Tokaanu.

12. Taupō Rose Garden

The rose garden was established on the original Armed Constabulary dump site in a project initiated by the Rose Society in 1979. The garden is maintained by the Taupō District Council and is a popular venue for weddings and picnics.

13. Great Lake Taupō Museum and Art Gallery

The Great Lake Taupō Museum and Art Gallery occupy part of the original Post Office building which was constructed in 1911. This building housed the Taupō Library until December 1991. Outside the museum rests an old mill steam engine. The Museum and Art Gallery display a comprehensive collection of historical artefacts and a permanent art collection. Visiting exhibitions are a regular feature.

14. Women's Suffrage Garden

This garden honours the women, like Kate Sheppard, who led the campaign for votes for women in 1893. The garden was created as a centennial project in 1993.

15. Old Oak Tree

This tree was planted in Story Place at least 80 years ago for John Seddon (New Zealand's Prime Minister from 1890 to 1912).

16. Totara Trees

These three totara trees were planted in memory of New Zealand Prime Minister Norman Kirk (1923 - 1974).

17. Library and Information Centre

The Taupō Library was opened in 1991. The first library was established in the 1880s by the Armed Constabulary Unit near the Redoubt. Since then the library has always been located in the vicinity of Story Place (named after Taupō's first mayor - Joseph Story).

18. Great Lake Centre

This centre was opened in 1992 and contains a hall, theatre, multi-purpose dressing rooms and ancillary facilities. The Great Lake Centre Library and Information Centre were designed to reflect the mountains in Tongariro National Park (World Heritage area). The buildings contain columns with timber branches and canopies to reflect trees and much of the planting around the building has blue flowers to mirror the colour of Lake Taupō.

19. Landmark Canoe

(Adjacent to the Taupō Police Station)

This landmark canoe was found in the Opepe area when the land was being cleared for farming. The landmark canoe was brought to this site in 1967. It is the property of the Rutene family who allowed the canoe to be moved from its historic site.

20. The Armed Constabulary Hall/Old Courthouse

The Courthouse was built by the Armed Constabulary in 1881 and was called the Armed Constabulary Hall before becoming the Courthouse. Discussions leading to the formation of Tongariro National Park were held here in the mid 1880s. The building was originally sited behind the present Magistrate's Court until its relocation in 1966. The building is under the protection of the Historic Places Trust and is currently home to a local Te Kohanga Reo (a pre-school facility focusing on Maori language and culture).

21. Redoubt and Powder Magazine

The Tapuaeharuru Redoubt, built around 1870 by the Armed Constabulary (AC), housed about 30 men. The AC was used to 'put down rebellion, quell disturbances, preserve the peace, prevent robberies and other felonies, and apprehend offenders against the peace'. Their presence provided the foundation for the establishment of Taupō township. Vegetable gardens, soldiers' tents, the mess etc were all located around the redoubt in what is now the Domain. In 1877, with the establishment of a new constabulary force, the AC went out of existence. However, the Redoubt, the trenches and a powder magazine (restored in 1966) still exist.

22. Waikato River Lookout

Breathtaking lake, river, boat harbour and mountain views. The lookout was constructed by the Taupō District Council and designed by the NZ Institute of Architects during their conference in 1993 held at the Great Lake Centre.

23. Waikato River

This is New Zealand's longest river (425 km) and the only outlet for Lake Taupō.

24. Scented Garden

The scented garden was donated by the Soroptomist International of Taupō with the assistance of the Taupō Lions Club.

25. Control Gates

Built across the Waikato River, the Control Gates were completed in 1942. The gates control the flow of water to eight hydro electric power stations situated on the Waikato River. On average 180 m³ of water flows through the gates every second.

26. Settler's Cemetery

This is the original Settler's Cemetery. Amongst those who rest here are Thomas Balfour Noble, a long time proprietor of the Lake Hotel and surgeon Samuel Walker, who served with the Armed Constabulary.

27. Taupō Primary School

In 1894 the first building of the present Taupō Primary School was built. It still stands today - one of the few remaining historic buildings in the Great Lake Taupō Region. By 1914 the number of children in the area had grown so dramatically that some had to be taught in an old shed on the school site.

Taupō Boat Harbour

WALKS CLOSE TO TAUPŌ TOWN

Walkways link many of Lake Taupō's residential streets, gullies and reserves – look out for the 'Walkway' signs.

Waipahihi Botanical Reserve

Map: page 18. Follow SH 1 south from Taupō and turn left onto Shepherd Road (second left after the Napier/SH 5 turn-off).

The reserve (35 ha) was formed in 1966 to create a park of forest trees and plants and to be a refuge for birdlife. Of special interest are the alpine garden, lemonwood walk and the 2000 rhododendrons, azaleas and camellias. There are walkways, beautiful lake and mountain views and attractive picnic areas.

Great Lake Walkway Taupō to Wharewaka Point

Time: varies depending on which exit you take. Map: page 18.

This walkway is part of what may eventually become a track around all of Lake Taupō.

From the Great Lake Taupō Yacht Club follow the path beside Lake Terrace to the Taharepa Road Reserve where a paved track skirts the lake edge to Two Mile Bay then Wharewaka Point. Ideal picnic and swimming spots can be found along the way. Toilets can be found in all of the bays and there is a children's playground and barbecue facility at Wharewaka. Return via the same track or arrange transport back to town.

Great Lake Walkway Wharewaka Point to Five Mile Bay

Map: page 18. Drive south on SH 1 for about 6 km and turn off at Wharewaka Point. The walk begins at the reserve and follows a formed track on a terrace above the lake edge for 1 km, then passes through several paddocks to the Five Mile Bay Lakefront Reserve.

Control Gates Bridge to Spa Thermal Park

Time: 1 hour

Map: page 18. From the Control Gates bridge follow the true right of the Waikato River. Pass the waste treatment station on the right and at the end of the entrance road take a sharp left. Turn right after 20 m and follow the path to Cherry Island. Head along the river to the steps up to Taupō Bungy. From the top it is only 200 m to Spa Thermal Park.

Huka Falls Walkway

Time: 2 hours return via the same track.

Map: page 18. Turn right off Tongariro Street into Spa Road at the northern end of Taupō, then left into County Avenue and drive into Spa Thermal Park. Following the signs, walk for five minutes across the park to the Waikato River.

Near the start of the walkway, a bridge crosses a natural hot stream. The well-defined track winds along the riverbank and offers lovely views on the way. The walk finishes at the spectacular Huka Falls, where the Waikato River is confined to a deep rock channel. The river emerges with a rush at the northern end to form the falls.

A pleasant walk for the whole family. Return via the

same track or arrange transport from Huka Falls carpark (across the bridge). This walk can be linked with the Aratiatia Rapids Walk.

Rotary Ride: Spa Thermal Park to Huka Falls

Time: 2 hours return via the same track

Map: page 18. This is a shared bike track where walkers give way to bikes.

Follow the signs from the end of County Ave (off Spa Road). The track crosses the Otumuheke Stream approximately 200 m upstream from the Waikato River. From here the track meanders through gullies, twists around trees, runs alongside open farmland, crosses two bridged streams, passes through culverts and has great views of the Waikato River and open valleys.

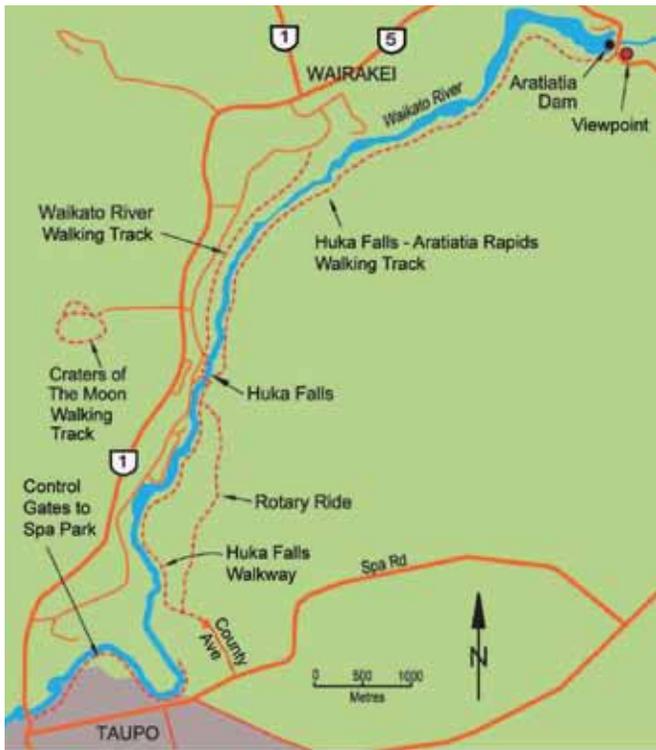

Huka Falls to Aratiatia Rapids Walking Track

Time: 4 hours return via the same track

Map: page 18. Follow SH 1 north from Taupō for about 1.6 km, turn right into Huka Falls Road and follow the signs to Huka Falls. A refreshment kiosk and pay toilets are located in the carpark.

The track begins across the bridge. Head left to the last viewing area over Huka Falls. At the back of the viewing area the track climbs onto the cliff tops with magnificent views of the river. It then gradually descends and continues along the river to the Aratiatia hydro dam and rapids. Try to finish the walk when the control gates are due to open (see note in next section). Return via this route or arrange transport from Aratiatia.

Aratiatia Rapids Viewpoint

A short track to three lookouts over the Aratiatia Rapids begins 50 metres from the bridge on the true right of the river. The dam's control gates are opened several times a day to allow the rapids to flow - a spectacular sight. Check times with the Taupō Visitor Centre.

Craters of the Moon Walking Track

Time: 1 hour loop track - *Entrance fee applies*

Map: page 18. Follow SH 1 north from Taupō for approximately 6 km. Turn left into Karapiti Road. Continue for 1.5 km to the Craters of the Moon carpark.

This is a walk with a difference in a lunar-like landscape. It is a dynamic thermal area formed when drilling began nearby at the Wairakei Geothermal field in the 1950s. The walk features sizzling and bubbling craters, mud pools and steam vents. Keep to the boardwalks as constant changes in thermal activity can make the ground unstable and dangerous.

Cycling is not permitted on this track but is allowed on the adjacent Craters of the Moon Mountainbike Tracks.

Craters of the Moon Walking Track

Waikato River Walking Track

Time: 1 hour one way

Map: page 18. This walk begins at the Huka Falls carpark and ends at Otupo Flat. Return on the same track or arrange return transport.

Five minutes down the track there is a grassed area with a good view back to the falls. From here there is a short steep climb up to a road then the track drops again to the river and ambles along through a variety of terrain and vegetation. There are several short side tracks to points of interest along the way.

Acacia Bay Beach Walking Track

Time: Varies depending on the route taken.

Map: page 22. Follow SH 1 north across the Control Gates, turn left onto Norman Smith Street, then left into Acacia Bay Road. Turn left into Te Kopua Street and park at the end of the cul-de-sac.

Walk through patches of native bush to the lake shore then up to the reserve again. Veer right and wander through native bush until the track climbs steeply to Acacia Bay Road. The walk follows the lakeshore and is marked with Scenic Walk signs. The beach walk is also accessible from other points along Acacia Bay Road and can be linked with Little Acacia Bay Walk.

Little Acacia Bay Walking Track

Map: page 22. Starts about 1 km past Te Kopua Street, heading towards Acacia Bay. The track leads downhill and then to the lake edge through native bush and opens out at Little Acacia Bay.

Rangatira Point Walking Track

Time: 1.5 hours return

Map: page 22. Follow Acacia Bay Road past the boat ramp and on for another 2 km. The track starts at the first carpark on the left.

The track leads around the lakeshore to Totara Bay. There is a large group of pines at Te Karaka Point at the far end of the bay. A side track from this point leads back to Acacia Bay Road. The main track continues to Rangatira Point then loops back to meet the road. Excellent lake views. Vehicle access to both ends of this track.

Whakamoenga Walking Track

Time: 1 hour return via the same track

Follow Acacia Bay Road to the roadend carpark.

Map: page 22. Begin on the Rangatira Point Track. Turn right at the first junction. An easy graded track runs through the bush beside the lake around to Whakamoenga Point. There are good views across the lake from many points along the walkway. Please respect adjacent private property by staying on the track.

Note: The Rangatira and Whakamoenga Point Tracks can be walked together (2.5 hours return).

Mapara Walkway

Time: 20 minutes return

Connects Mapara Road to the end of Brunette Drive. A boardwalked track through native planting restoration areas. Magnificent views.

Kawakawa Bay Walking Track

Time: 4 hours return

Travel north from Taupō on SH 1 over the Waikato River. At the top of the hill turn left into Poihipi Road and follow signs to Kinloch (24 km). Go past the boat marina to a parking area by the beach in Nisbett Terrace.

The track to Kawakawa Bay begins at the western end of the beach to the right of the parking area. The track entrance is signposted.

Glorious views feature as the track climbs from Whangamata Bay and sidles along the top of a broad cliff. The bush is dominated by rewarewa but look out for the giant matai too. Once you reach the rocky lookout the track drops down to Kawakawa Bay.

Whakaipo Bay to Kinloch Track (W2K)

Time: 4.5 hours one way

Map: page 22. Take SH 1 north out of Taupō, cross the Control Gates, turn left onto Norman Smith Street, left onto Acacia Bay Road, and right onto Mapara Road. Follow this for 6.7 km then turn left onto the unsealed Whakaipo Bay Road. Head down towards the beach then veer right to the main car park.

This track begins by climbing over the stile and following the directional boards and track markers. It is a fairly easy family friendly 14km tramp, with hills and undulations. There are no streams to cross but there are some steep edges where care must be taken, and there are several picnic stops along the way.

“The Headland” is an additional 10km track suited to fitter walkers which can be added on. A good way to do this walk is to split the party and have vehicles at either end of the route.

Note: This track is a share mountain bike/walking track, and there are blind corners, summits and bends where bikes can travel up to 30kms per hour, so caution is needed.

Tahunatara Point Walking Track

Time: 1.5 hours return

Map: page 22. Take SH 1 north out of Taupō, cross the Control Gates, turn left onto Norman Smith Street, left onto Acacia Bay Road, and right onto Mapara Road. Follow this for 6.7 km then turn left onto the unsealed Whakaipo Bay Road. Head down towards the beach then veer left to the track signs. Park beside the fence.

The track begins across the Mapara Stream bridge. Cross the stile to the right of the bridge and follow the track markers past the boat ramp and along the lakeshore through regenerating bush. It's an easy walk on level ground - ideal for families. There are several picnic and fishing spots along the way.

At the end of the track there are views over the lake to Karangahape cliffs and the Tongariro National Park volcanoes. Walk a further five minutes to view Tahunatara Point. Return via the same route.

Note: This track crosses private land leased by the department from the trustees of the ID2 Maori Land Trust. Please respect the landowners wishes and stay on the track.

Opepe Graves and Northern Walking Track

Time: 30 - 45 minutes, loop track

Map: page 18. Follow the Napier/Taupō Highway (SH 5) 17 km from Taupō. The highway bisects Opepe Scenic and Historic Reserve and there are car parks on both sides of the road.

On the northern side a short walk brings you to a graveyard where members of the Bay of Plenty Cavalry, who died in an engagement with followers of the Maori warrior Te Kooti, were buried. Later, residents of Opepe Township and the Armed Constabulary were also buried there.

Continue around the bush loop track through mature podocarp (rimu, matai, miro) forest - unusual in this region as so much was destroyed by the Taupō eruption of 186AD and later by fires and the woodman's axe.

Opepe Southern Walking Track

Time: 1 - 1.5 hours, loop track

Map: page 18. This track is situated on the southern side of SH5. Taking the track to the right from the car park you have the option of walking to a pitsaw pit and returning (20 minutes return) or continuing around the loop.

Approximately 20 minutes past the pitsaw pit is an historic water trough and totara fence, relics of the old township. As you continue up the track to the site of Opepe township you cross the original Napier Taupō Road. At one time Opepe Township had a hotel, a store and several dwellings. The remains of water wells can still be seen. An Armed Constabulary stockade, occupied from 1869 to 1885, was situated on the western escarpment.

Waitahanui River Walking Tracks

Time: Varies depending on entry and exit points

Map: page 18. Drive 12 km south from Taupō on SH 1 to Waitahanui. Park at the carpark near Waitahanui Bridge on the lake-side of the road. The track begins on the true left of the river on the opposite side of the road from the lake and meanders alongside the Waitahanui River.

These tracks are for fishing access. Be aware of anglers casting their lines in the numerous trout pools. The track upstream on the true left of the river is in scenic reserve as far as the third footbridge and is open to the public. All other tracks are on private land and are open to angling licence holders only.

Fishing Access

Under the Maori Land Amendment and Maori Land Claims Adjustment Act 1926 an angler who is the holder of a current Taupō District fishing licence is entitled to walk within a 20 metre right of way along the banks of the main fishing rivers flowing into Lake Taupō. For the most part this access is across privately owned Maori land and the access rights do not include access for vehicles. On some rivers the right of way extends from the mouth, upstream for a defined distance and on other rivers all the way to their source. For more information check the angling information signs located at key access points on the major fishing rivers.

A Taupō District fishing licence is required for Great Lake Taupō and its tributaries. A fishing licence purchased for other parts of New Zealand is not valid in this area. Licences can be obtained from sports shops and various motels, shops and service stations.

Fly Fishing - Lake Taupō

Rimu Walking Track

Time: 30 minutes for the circuit

Map: see below. A pleasant loop track through stunning podocarp forest. Cross the bridge at the Kakaho Campground and follow the river around to a great swimming hole. From here there is a climb up to a lookout with good views of Mount Pureora then you circle back to join the road just above the campground.

Waihora Lagoon Walking Track

Time: 20 minutes return

Map: see below. Drive up Waihora Road off SH 32. Follow the signs to the Waihora Lagoon carpark. It's an easy, flat walk in to the small rain-fed lake surrounded by immensely tall kahikatea and rimu trees. After heavy rain the lagoon can flood into the

surrounding forest effectively blocking off access to the edge of the clearing.

Waihaha Tramping Track / Waihaha Hut

Time: 3 hours to the hut / campsites

Map: page 28. The track starts on SH 32 beside the Waihaha River. The grade is generally easy with a few short steep sections. Initially you meander through regenerating bush before sidling upwards along the edge of the Waihaha Gorge. At the top of the gorge the track diverts away from the river and climbs over a low hill to Pokaiora Clearing - a large heathland covered in tussocks and monoao. At the far end of the clearing you enter the forest again for a 20 minute stroll through to the hut. The hut sleeps 10 and there are good tent sites in the clearing around the hut. Most people return to the carpark on the same track but there are longer routes available that follow the main Hauhangaroa Range. Talk to the Department of Conservation for more information.

Bog Inn Tramping Track / Bog Inn Hut

45 minutes to the hut

Map: page 28. It's a convoluted route to the start of the track but worth the effort. Take Kakaho Road off SH 32. Turn left just past the campground onto Tihoi Rd. After 7½ km turn right at the T-junction, then after 1½ km left on to Bog Inn Rd. Park by the timber bridge.

It's a steady, easily graded climb to a ridge where the track south to Weraroa and Waihaha Hut turns off to the left. Five minutes on, another track branches off to the right, this time to Pureora. The main track carries on straight ahead for 10 minutes then skirts

around the edge of an open boggy area to the four-bunk hut which is nestled into a small forest clearing. A short track from the hut leads out to the edge of the bog.

Staying the night

To stay overnight in either of these huts you will need to pre-purchase hut tickets. The charge is from \$5.00 per night for adults. Tickets are available from most Department of Conservation offices and information centres.

Other walks in Pureora Forest Park

There are many other good walks in the park (e.g. Mt Pureora, the Totara Walk) but they are further away from Taupō. For more information pick up a Pureora Forest Park brochure.

Waihaha Hut - Photo: K. Broome

WALKS NEAR TURANGI

Motutere/Waipahi Walking Track

Time: 1.5 hours return via the same track

Map: page 32. Located approximately 22 km north of Turangi on SH 1. After passing Hallett's Bay, then Jellicoe Point, get ready to park on the left opposite the north end of the Motutere motor camp.

The track climbs through regenerating bush above SH 1. Along the way there are great views of Motutere Bay in the south, Motutaiko Island and Jellicoe Point to the north. The track descends through large kanuka trees, groves of young matipo and passes beside cliffs of volcanic ignimbrite from the Great Lake Taupō volcano. For a short time the track follows an old man-made terrace, once part of the main road, then crosses the Waipahi Stream. There are toilets and picnic areas at the lakeshore reserve of Jellicoe Point just across the road from the end of the track.

Walkers are advised to return via the track to Motutere or arrange to be picked up at your finishing point. This section of the main road is too busy and narrow to safely walk along.

Motuoapa Cliff Lookout Walking Track

Time: 15 - 20 minutes, return via same track

Map: page 32. Begins beside northern end of Motuoapa Lodge in Motuoapa, 10 km north of Turangi on SH 1.

The track heads up to the volcanic cliffs behind Motuoapa to a wooden viewing platform. The lookout offers excellent views of Stump Bay, Motuoapa Peninsula, the South Taupō wetlands and Lake Taupō. Please treat with respect as it is of

cultural importance to Ngati Tuwharetoa.

Return via the same track, or for a slight variation during the descent, continue along a path which leads to the north end of the settlement and return alongside the state highway to the track entrance.

Tauranga/Taupō River Walking Track

Time: 30 minutes, return via same track

Map: see below. Park on the south side of the Tauranga/Taupō River (about 12 km north of Turangi on SH 1). Cross the bridge, the track entrance is marked on the left at the corner.

This track follows the tranquil Tauranga/Taupō River for 15 minutes to the shore of Lake Taupō. The beach is a great spot for picnicking, fishing and swimming. Enjoy panoramic views of the Western Bays, Motutaiko Island, Taupō town and Mt Tauhara. Those wanting a longer walk can continue on along the foreshore toward the lakefront settlement of

Waitetoko. The first public access to SH 1 is at Mac's Road 10-15 minutes along the beach.

Tauranga/Taupō Reserve Walking Track

Time: 30 minutes, return via same track

Map: page 32. Turn off SH 1 onto Heuheu Parade on the south side of the Tauranga/Taupō River at Oruatu, 12 km north of Turangi. Then turn left into Kopua Street and follow the unpaved one way road to a grassy lakeside clearing. A sign at the clearing's entrance marks the start of this track which winds through the bush reserve towards Oruatu. After about 10 minutes the track branches. The options are to continue on to Oruatu Avenue (5 minutes) or take the right branch and walk for 15 minutes to the lake.

The main track leads to Oruatu Avenue. From here, either return via the same track or follow the road 500 m to the beach at Oruatu. Shade trees make this a popular picnic spot in summer.

The track can also be walked south to north from Oruatu Avenue through to the river. From SH 1 it is less than 100 m down Oruatu Avenue to the grassed accessway on the right leading to the track entrance. Once the northern end of the track is reached it is a short walk along the beach to the Tauranga/Taupō River mouth.

Te Hapua

Time: 45 minutes to walk to the bay

Map: page 38. Access by boat or from Karangahape Road (off SH 32) along a poled easement through farmland to the reserve.

Te Hapua (or 'Scenic Bay') on the western shore of Great Lake Taupō is ideally reached by boat. From the lake edge it takes 15 minutes to walk up to a viewpoint just below the farmland, or 10 minutes to reach a bay to the south. Te Hapua Reserve is intended for day visitors.

Pukawa Bush Walking Track

Time: 45 minutes, loop track

Map: page 38. Begins on Hauraki Terrace (off Pukawa Road); the entrance is just past Rereao Lane. The track is usually walked in an anti-clockwise direction.

The track climbs up through Pukawa Bush above the village on a well graded route. A short way up there is a lookout with views over the village and lake. The lush podocarp forest contains large rimu, matai and totara trees. Birdlife is a feature of this area; bellbirds and tui in particular frequent this part of the bush.

The bush gradually changes to a rewarewa/kamaha forest and near the top opens out to a magnificent view of Great Lake Taupō and the surrounding countryside. Descending again, the last part of the track follows the route of the old Pukawa Road. The track ends on Rereao Lane which you can follow back to your starting point.

Pukawa to Omori Walking Track

Time: 1 hour 20 minutes, return via same track

Map: page 38. Begins at end of Kaiuru Avenue in Pukawa village (15 minutes drive west of Turangi – signposted to the right off SH 41).

The track wanders through the bush along the edge of Lake Taupō. Bellbird and tui may be seen in the trees above and from time to time there are glimpses of nearby Lake Taupō. The track emerges onto the shingle beach and picnic area at Omori Reserve.

The reserve is notable for kowhai trees which create a splash of bright yellow when flowering. Aluminium bands have been placed around some kohuhu trees to prevent possums from climbing up to eat the palatable native mistletoe.

The track continues on over the Omori Stream where in winter spawning trout may be seen. Another 10 minute walk sees the end of the track at the Omori Boat Ramp.

Pukawa to Omori - Photo: J.Johnson

Tokaanu Thermal Walk

Time: 20 minutes, loop track

Begins from Tokaanu Thermal Pools complex (6 km from Turangi on SH 41).

Map: page 38. This short walk provides an interesting glimpse of a natural thermal area. See steaming hot mineral pools set in sinter basins and spluttering mud pools amidst the native bush. Thermal areas are changeable by nature so please keep to the track. Children should be supervised at all times.

For hundreds of years, Maori have used the geothermal resources of this area for cooking, bathing and leisure. Share in this tradition by having a therapeutic and relaxing swim at the nearby Tokaanu Thermal Pools. Rainbow trout can often be seen in the cold Tokaanu Stream beside the thermal area.

Maunganamu Walking Track

Time: 40 minutes, return via same track

Map: page 38. About 4 km from Turangi, turn off SH 41 into the Maunganamu Scenic Reserve beside the Tokaanu Tailrace bridge. Drive along the gravel road for nearly 1 km. Veer left at the intersection and park in the grassy clearing.

The track begins at the bush edge and leads around the hill and up to a lookout near the summit (490 m). The views of Tokaanu, across to Waihi, and southern Great Lake Taupō are excellent. Maunganamu ('Mosquito Hill') is an old volcanic dome composed of rhyolite rock.

Rotopounamu Walking Track

Time: 30 minutes walk to the lake, one way or 2 hours to and around the lake loop track (5 km)

Map: page 38. 11 km from Turangi off SH 47, carpark signposted on the south side of Te Ponanga Saddle.

Rotopounamu ('Greenstone Lake') nestles on the side of Mt Pihanga. This beautiful lake is a special favorite of tree lovers, birdwatchers, walkers and swimmers.

Beginning opposite the carpark the track winds gently uphill. At the junction the track to the left goes to Ten Minute Beach which is a pleasant picnic and swimming spot in summer. To walk around the lake turn right at the junction and follow a short section of metalled track before dropping down towards Five Minute Beach. Here a broad tree stump provides a good spot to view the lake. Rotopounamu was formed by a landslide about 10,000 years ago. It is nine metres deep and covers one square kilometre.

Long Beach sweeps along the eastern side of the lake and is an ideal spot for a picnic or rest stop. There is a toilet here. From here the track continues to the northern shore where three of Rotopounamu's four tributary streams enter the lake. The lake has no visible outflow and possibly drains via an underground stream or seepage.

Continuing on, you will pass Ten Minute Beach and soon return to the track junction. From here it is downhill to the carpark. Take care crossing the road back to your vehicle.

Tongariro River Lookout Track

Time: 1 hour, loop track

Begin at the SH 1 bridge or the Major Jones footbridge, Koura Street, Turangi.

Map: page 32. This loop track can be walked in either direction. It is described here from the SH 1 access point. Walk up to the first lookout on the northern side of the bridge. From here the track climbs steeply to a viewpoint over the Tongariro River, a trout fishery of international renown. Mt Pihanga, and the eroded volcanoes of the northern range of Tongariro National Park form a backdrop to the town of Turangi. The track wanders through bush to the Major Jones footbridge at the southernmost point of the track.

Cross the bridge and continue the loop following the track downstream. This side is an easy flat walk in a more urban setting. It passes through a narrow stretch of public land alongside the river.

Tongariro River Walkway - Photo: S Frimmel

Tongariro River Walkway

Time: 3 hours, return via same track. Or 1 hour 30 minutes one way (arrange return transport)

Map: page 32. Begins at Major Jones footbridge, Koura Street, Turangi; or Red Hut footbridge, 5 km south of Turangi, off SH 1.

This popular walk follows the Tongariro River south of Turangi. There are good views of the river's calm pools and rippling rapids as you walk along the high banks above the river. The walk passes through native bush on the river edge and along the edge of private farmland. Keep an eye out for trout in the river pools.

Tongariro National Trout Centre

5 km south of Turangi off SH 1.

Open 10am - 4pm (1 Sept - 30 April) 10 am - 3pm (1 May to 30 Nov).

Map: page 32. A pleasant half-hour walk passes through the Tongariro National Trout Centre facilities beside the Tongariro River. Display panels explain the management of the Taupō Fishery while a viewing chamber provides underwater views of rainbow trout. A ranger is present during open hours for guidance and answering questions.

KAIMANAWA FOREST PARK

Kiko Road Walking Track

Time: 1 to 1 hour 30 minutes, loop track

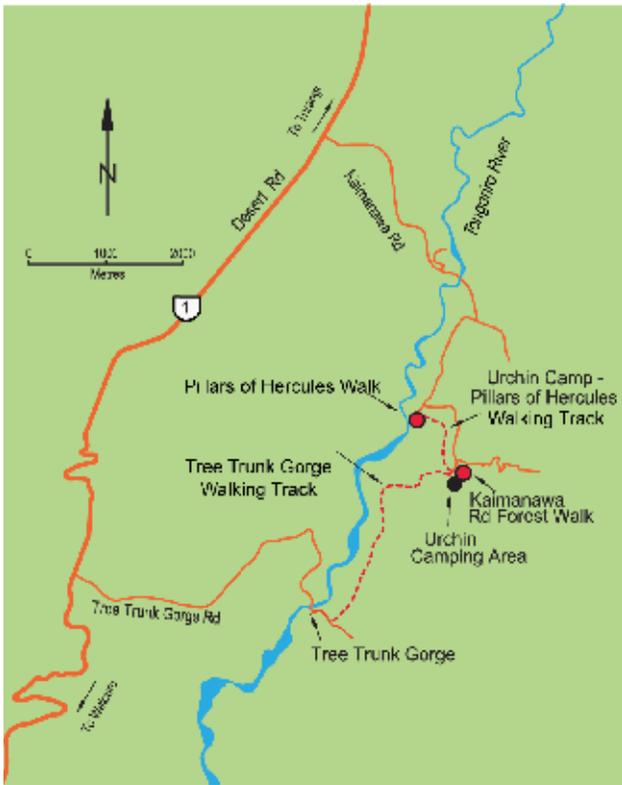

Map: page 32. Drive 10 km north of Turangi on SH 1. Turn right into Kiko Road and continue for another 17 km to the Kaimanawa Forest Park carpark. Do not deviate from the main Kiko Road into the adjacent privately owned pine forest.

A feature of this track is the variety of forest types seen during the walk. The western aspect is a podocarp forest of matai, miro and rimu (pictured below). The bush to the northwest was milled right up to the track and is now regenerating. In the distance there is a view of Lake Taupō. Further around to the northeast the forest changes, red/silver beech and kamahi dominate with an understorey of crown fern.

From the Ngapuketuru junction it is 15 minutes back to the carpark and picnic area.

Tongariro National Trout Centre

Kaimanawa Road

The following short walks lie south of Turangi in Kaimanawa Forest Park. Drive 15 km down the Desert Road (SH 1) to Kaimanawa Road. Further to the south, off SH 1, the Tree Trunk Gorge Road also provides access to some of these walks. For more information ask at information centres for a Kaimanawa Forest Park pamphlet or map.

Pillars of Hercules Walk

Time: 10 minutes, return via same track

Map: see page 42. Begins at the end of a short access road, signposted off Kaimanawa Road about 2 km from SH 1.

A short walk brings you to the gorge known as the Pillars of Hercules. Take care on the steep steps at the beginning of the walk. This deep gorge was formed as the river eroded a narrow channel through ancient lava flows (350,000 years and older) of andesite and ignimbrite rock. It looks even more spectacular from the air as the Tongariro River can be seen to suddenly narrow as it passes through this chasm.

Urchin Camp - Pillars of Hercules Walking Track

Time: 1 hour, return via same track, or along the road

Begins from the Urchin Camping Area.

3 km along Kaimanawa Road or from the Pillars of Hercules carpark.

A pleasant walk through kamahi forest with occasional views down to the river.

Kaimanawa Road Forest Walk

Time: 20 minutes, loop track

Begins from the Urchin camping area 3 km along Kaimanawa Road

A gently sloping, easy walk through beautiful native bush. There is a notable variety of forest types to be found on this short walk.

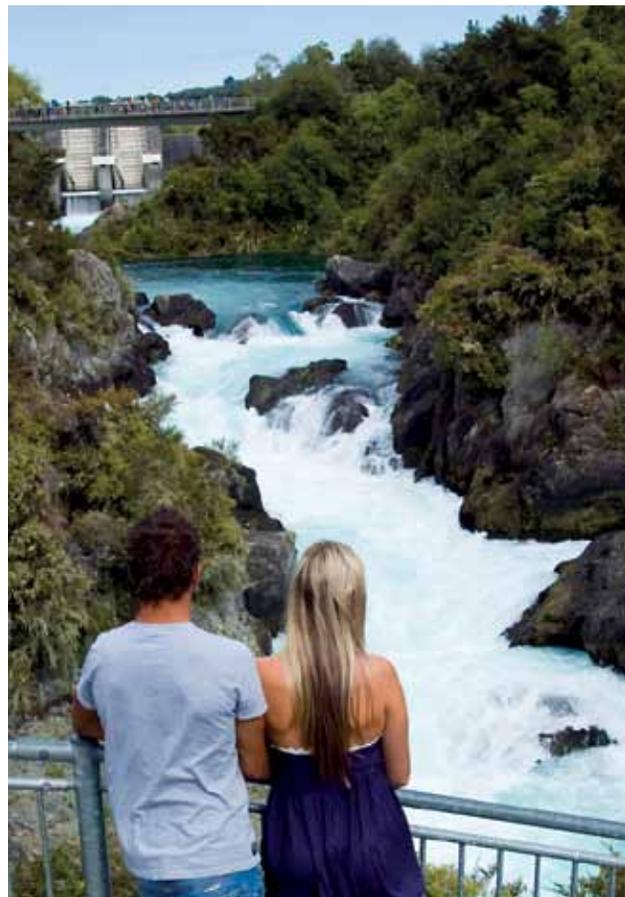

Tree Trunk Gorge Walking Track

Time: 2 hours 30 minutes, return via same track

Begins from Urchin camping area on Kaimanawa Road; or from Tree Trunk Gorge Road where the track begins about 200 m past the Tongariro River bridge on the left.

A stroll through a range of native forest along an old Tongariro Power Scheme road. The track climbs to a ridge where you can look out over the Tongariro River. On a clear day there are views of Tongariro National Park. A stream crossing near the confluence with the Tongariro River makes a good rest stop.

The use of mountain bikes is permitted on this track. Bikers should be considerate of walkers.

Aratiatia Rapids
